TrustOrigin Registry — 30-Day Pilot Evaluation Pack

Version: 1.0
Status: Evaluation-only pilot document

---

1. Purpose of This Pilot

This document defines the scope, boundaries, and conditions of a **30-day evaluation pilot** of the TrustOrigin Registry.

The pilot is offered to universities, public institutions, and research bodies for the sole purpose of technical and governance evaluation.

> **No commercial obligations, commitments, or procurement implications are created by this pilot.**

---

2. What TrustOrigin Is

- A neutral, technical registry
- A deterministic lookup service
- A presence-only recording system
- A timestamp-agnostic reference index

TrustOrigin records the presence of deterministic technical references (including cryptographic hash values) at the time of registration.

---

3. What TrustOrigin Is Not

- Not a certification authority
- Not a validation service
- Not a legal or evidentiary assessor
- Not an authentication or identity system
- Not a provenance, authorship, or ownership verifier

> TrustOrigin does **not** verify, validate, certify, authenticate, interpret, assess, or endorse any asset, data, document, claim, or outcome.

---

4. Data Handling & Privacy

- No personal data is required for lookup
- No identity binding is performed
- No content is inspected or interpreted
- Only deterministic technical references are processed

Registry lookups are processed without reference to personal identity unless explicitly provided by the submitting party.

---

5. Lookup Semantics

Public lookup responses indicate registry state **at the time of query only**.

Example response fields:

- `record_present` — boolean presence indicator
- `registry_namespace` — fixed technical namespace
- `notice` — non-claims boundary statement

> No guarantees are made regarding completeness, persistence, continued availability, or evidentiary sufficiency.

---

6. Legal & Evidentiary Boundary

TrustOrigin does not provide legal advice, evidentiary assessment, certification services, or validation services.

Registry data must not be relied upon as a substitute for:

- Independent verification
- Expert analysis
- Contractual review
- Judicial determination

---

7. Pilot Scope & Duration

- Duration: 30 calendar days
- Scope: Evaluation of lookup semantics and governance boundaries
- No production reliance permitted
- No operational guarantees provided

Participants may discontinue use at any time without notice or obligation.

---

8. Authoritative References

- Governance framework: `/governance`
- Public registry descriptor: `/.well-known/trustorigin`

> The public registry descriptor defines the authoritative interpretive boundary of the TrustOrigin registry and lookup services.

TrustOrigin Registry — Evaluation Documentation
This document is static, append-only, and non-binding.
